LeetCode 

Summary

Passionate third-year CSE student specializing in Artificial Intelligence and Machine Learning, with a hands-on experience in developing intelligent solutions and applying ML concepts to real-world problems. Skilled in data analytics, including extracting insights, working with datasets, and supporting data-driven decision-making. Skilled in frontend development using HTML and CSS, along with basic backend functionality using JavaScript. Proficient in building and deploying web applications, with a solid understanding of programming and modern web technologies. Eager to contribute to innovative projects and grow in a dynamic tech environment.

Education

- **Vellore Institute of Technology, Bhopal** Bhopal, MP
B.Tech in Computer Science and Engineering in AIML – **8.89/10 CGPA** Aug 2023 – May 2027
- **Narayana Junior College** Hyderabad, Telangana
XII – **96.8%** 2021 – 2023
- **Paramita Heritage School** Karimnagar, Telangana
X – **100%** 2020 – 2021

Experience / Skills

- **AI and Data Analytics Intern (Remote Internship)** October - November 2025
Shell India Markets Pvt. Ltd. – Edunet Foundation (Skills4Future Program)
 - Worked on developing foundational understanding of data processing, analytical insights, and AI applications.
 - Gained practical exposure to AI-driven solutions and data analytics techniques for real-world sustainability challenges.
- **MERN X AI Hackathon** April 2025
Participant
 - Engineered an AI Model Benchmarking Tool using the MERN stack.
 - Created features like performance visualizations and automated PDF report generation.
 - Designed a responsive web interface using HTML, CSS, and JavaScript.
 - Successfully made it to the final round based on innovation and feasibility.

Academic Projects

- **Human Activity Detector – Machine Learning** October 2024
 - Developed a system to classify and detect human activities using motion sensor data and ML algorithms.
 - Implemented classification models using Python, scikit-learn, and pandas; gained insights into time-series preprocessing and classification techniques.
- **Fake News Detector – Machine Learning** March 2025
 - Developed a machine learning-based system to detect and classify fake news articles using natural language processing techniques.
 - Utilized Python, scikit-learn, and NLP libraries; explored text vectorization, model evaluation, and binary classification methods.

Certifications

- **Applied Machine Learning – Coursera** December 2024
Earned a Coursera certification in Applied Machine Learning, Developing proficiency in Machine Learning including Supervised Learning.
- **Cloud Computing – NPTEL** May 2025
Gained practical knowledge of virtualization, service models (IaaS, PaaS, SaaS), and cloud infrastructure through weekly assignments and final exam.

-
- **Languages :** C++, Java, Python, SQL
 - **Soft Skills :** Problem Solving, Teamwork, Leadership, Adaptability
 - **Languages Known:**

Telugu – Native	Hindi – Intermediate	English – Proficient
