Summary

CSE undergraduate specializing in Artificial Intelligence and Machine Learning with experience in machine learning, deep learning, data analytics, and computer vision. Skilled in Python, PyTorch, scikit-learn, and pandas, with experience building ML pipelines and data-driven solutions. Strong foundation in programming, DSA, DBMS, and software development.

Education

- | | |
|--|-------------------------------------|
| •Vellore Institute of Technology | Bhopal, MP |
| B.Tech in Computer Science and Engineering in AIML – 9.01/10 CGPA | Aug 2023 – May 2027 |
| •Narayana Junior College | XII – 96.8% Hyderabad – 2023 |
| •Paramita Heritage School | X – 100% Karimnagar - 2021 |

Experience

- | | |
|--|-------------------------|
| • Advanced Software Engineering & AI Foundation Intern | May - August 2026 |
| MPOne Limited (Remote Internship) | |
| ◦ Contributed to the development of LabStock AI , a team-based software project focused on laboratory inventory management and AI-enabled functionality. Collaborated with team members to design, develop, test, and integrate features as part of the complete application. | |
| ◦ Worked on software engineering components including application development, backend integration, database operations, and implementation of project features. | |
| • AI and Data Analytics Intern (Remote Internship) | October - November 2025 |
| Shell India Markets Pvt. Ltd. – Edunet Foundation (Skills4Future Program) | |
| ◦ Developed foundational understanding of data processing, analytical insights, and AI applications. | |
| ◦ Gained practical exposure to AI-driven solutions and data analytics techniques for real-world sustainability challenges. | |
| ◦ Applied data analytics and AI concepts to understand and address sustainability-focused real-world problems. | |

Academic Projects

- | | |
|---|--------------|
| • Natural Disaster Detection – Deep Learning | March 2026 |
| ◦ Developed a multi-class disaster image classification system using PyTorch and ResNet50. | |
| ◦ Built an end-to-end training pipeline including preprocessing, weighted sampling, evaluation metrics, and model checkpointing. | |
| ◦ Automated confusion matrix generation and performance reporting while improving model performance through class balancing and learning rate scheduling. | |
| • Human Activity Detector – Machine Learning | October 2024 |
| ◦ Developed a machine learning system to classify human activities from motion sensor data using Python, scikit-learn, and pandas. | |
| ◦ Applied time-series preprocessing and classification techniques to build and evaluate activity recognition models. | |
| ◦ Evaluated activity recognition models using classification metrics to assess prediction performance across different human activities. | |
| • Help Desk Ticket Management System – ASP.NET Core | August 2026 |
| ◦ Developed a full-stack ticket management system for creating, tracking, updating, and resolving support tickets. | |
| ◦ Designed RESTful CRUD APIs using Repository and Service patterns with Dependency Injection and HttpClient for application communication. | |
| ◦ Implemented unit testing using xUnit and Moq to validate controller and repository functionality and improve application reliability. | |

Certifications

- | | |
|--|----------------|
| • Applied Machine Learning – Coursera | December 2024 |
| • Cloud Computing – NPTEL | April 2025 |
| • Oracle Certified Foundations Associate – Oracle | September 2025 |
| • Introduction to Internet of Things – NPTEL | April 2026 |

Technical Skills

- | |
|---|
| • Languages : Python, C++, Java, JavaScript, SQL |
| • AI / ML : Machine Learning, Deep Learning, NLP, Computer Vision, scikit-learn, PyTorch |
| • Data Science : Pandas, NumPy, Data Preprocessing, Model Evaluation, Data Analytics |
| • Databases : SQL, MySQL, MongoDB |
| • Core Courses : DSA, DBMS, OOPS, Operating Systems, Computer Networks |
| • Soft Skills : Problem Solving, Teamwork, Leadership, Adaptability |
